Reference: Roosevelt Shores Environmental Assessment Worksheet (EAW)

Dear Mr. Marohn,

This letter is submitted as public comment in response to the EAW for the proposed Roosevelt Shores development.

After review of the submitted Preliminary Plat, we have concerns related to septic and structural setbacks along Sunset Court. Due to the already compromised eutrophic conditions of Roosevelt Lake, the proposed plan should consider potential degradation to water quality of such close proximities of the Fessel system drainfields to the shoreline. Furthermore, the structural and septic system locations directly adjacent to or within lakeside slopes over 25 percent are cause for erosion concerns.

The proposed plat should be reconfigured to account for these issues. Thank you for the opportunity to comment on this project.

Sincerely,

Elizabeth and Paul Heck
