> 2007

December 14,

> To Whom it may Concern:

> The Northern Lights over Lake Roosevelt proposal
> should be turned back because it makes totally
> improper use of the Natural scenic/geographical
> features of the area North of the City of Emily.

> We note that developing resort communities usually
> have business and public services along the arterial
> routes and keep intact as much as possible of the
> rural natural beauty of the scenery .

> Thus:

> 1. To trade a truly beautiful view of Lake Roosevelt
> for an eye sore view of a Marina is a gross mistake
> and loss of value asset.

> 2. To place cottages or essentially private
> structures along a road where business, services and
> tourist attractions will develop is a gross
> loss of potential tax assets.

> 3. Wherever a driver at Highway speeds has only a few
> seconds to adjust to an unexpected hazard, we have the
> potential for a deadly safety problem. This type of
> situation could easily develop as increasing numbers
> of motorists, pedestrians and pets mix with cross
> traffic, weather and darkness.

> In SUM; The main opportunity for the City of Emily is
> to arrange this expansion of population/tourism in a
> safe, beautiful and convenient environment. Keep in
> mindits Safety, Beauty and Facility that brings
> tourists/money to the North.

> Sincerely,
> Dr. John W. Ring
